Sir:

This paper is in response to the Official Action dated December 10, 1999.

Kindly amend the application in accordance with the following particulars:

IN THE CLAIMS:

Please amend claim 1, as follows:

1. (Three Times Amended) A positioning device for a miniature fan, comprising:

a coil seat including an axle tube, an upper polar plate assembly, a lower polar plate assembly, a winding mounted between the upper polar plate assembly and the lower polar plate assembly, the lower plate assembly including [an] a front end edge and a rear end edge; and

a circuit board mounted to the axle tube and including a sensor element adapted to activate a rotor, the sensor element located on a vertical line extending from one of said end [edge] edges of the lower polar plate assembly along a direction parallel to a longitudinal axis of the axle tube.
